**PSYC 101 General Psychology**  
3 credits

**Prerequisites:** Proficiency with written English  
**Instructor:** Stephanie Wilsey, PhD  
**Facilitator:** Ethan Bosch, MEd, CCDPD  
Diana Rice, PhD  
Debbie Schratz, MA, NCC, LPC  
Terri Williams, PhD

**Contact Information:** Faculty may be contacted through the Portage messaging system  
**Additional Information:** [www.portagelearning.com](http://www.portagelearning.com)*  
**Course Meeting Times:** PSYC 101 is offered continuously

**Course Description:** An introduction to the scientific study of behavior and a systematic presentation of its basic concepts and methods.

**Course Outcomes:** As a result of this course experience a student should be able to:

- Describe the scientific bases of psychology  
- Explain basic psychological concepts and principles  
- Describe the variety within the field of psychology  
- Know the basic terms of each major area of psychology  
- Analyze and critique the major psychological theories  
- Successfully study a more specialized area of psychology  

*Please see the Module Topics section below for expanded course outcomes.*

Each of these PSYC 101 student learning outcomes is measured:

Directly by:  
(1) Module application problems (with instructor feedback)  
(2) Module exams  
(3) Term paper  
(4) Cumulative final exam

Indirectly by an end of course student-completed evaluation survey

---

* Portage Learning college courses are offered by Geneva College, which is regionally accredited by the Middle States Commission on Higher Education. Portage Learning is included in the College’s Department of Professional and Online Graduate Studies; courses are delivered through the [PortageLearning.com](http://PortageLearning.com) platform.
Course Delivery: This course is asynchronously delivered online. Contact hours include 40 - 50 hours of reviewed module assignments with instructor feedback and video lectures. There are 12 additional contact hours composed of secure online exams.

Course Progression: It is the policy for all Portage Learning courses that only one module (lecture) exam is to be completed within a 48-hour period. Research on the best practices in learning indicates that time is needed to process material for optimal learning. This means that once an exam has been completed, the next exam may not be opened or taken until 48 hours after the submission of the previous module exam. This allows for instructor feedback/class expectations as the student moves through the material. Instructors, like the College, are not available during the weekend; grading, therefore, is M-F and may take up to 72 hours during these days. Also, it is the policy of Portage Learning to support a minimum of 21 days to complete a course; this is not a negotiable time period. Please plan your time accordingly.

Note: Professors reserve the right to reset any exam taken in violation of these guidelines.

Required readings, lectures and assignments: Portage courses do not use paper textbooks. Students are required to read the online lesson modules written by the course author which contain the standard information covered in a typical course. Please note exams are based upon the readings. Video lectures which support each lesson module subject should be viewed as many times as is necessary to fully understand the material.

Module Review Questions: The module problem sets are not quantitatively part of your final grade, but the module work is a pass/fail component of the course and will be reviewed for completeness by the instructor. Be sure to answer all problem sets, being careful to answer the questions in your own words at all times since this is an important part of adequate preparation for the exams. After you answer the module problem sets, compare your answers to those at the end of the module. If your answers do not match the answer key, attempt to figure out why there is a difference. If you have any questions, please contact the instructor via the Canvas messaging system (see Inbox icon).

Academic Integrity is a serious matter. In the educational context, any dishonesty violates freedom and trust, which are essential for effective learning. Dishonesty limits a student's ability to reach his or her potential. Portage places a high value on honest independent work. In a distance learning situation, we depend on the student's desire to succeed in the program he or she is entering. It is in a student's own best interests not to cheat on an exam, as this would compromise the student's preparation for future work. A violation of the academic integrity policy may result in a score of zero on the exam and possible expulsion from the course, at the discretion of the instructor with consultation with an administrative-instructional committee.

Please note the additional instructions about plagiarism below that apply specifically to the proper use of outside sources when writing a paper: Avoid the following forms of plagiarism:
Copying but failing to properly cite short quotes copied from a source.

Rewording major sections from a source but not citing the source.

Copying, but failing to cite several paragraphs throughout the paper.

Copying and pasting extensive portions of the paper from a source.

Copying, but failing to cite short quotes copied from a source may be one of the most common forms of plagiarism. Avoid this violation of academic integrity by making and keeping notes of information taken from any source including the information needed to create a citation.

Not copying directly, but rewording (paraphrasing) the information from a source but failing to cite the source is a violation of the academic integrity agreement. Make sure you avoid this form of plagiarism by including a citation after any words, data, and information that are not your own, original thoughts or words.

Copying extensive portions of the paper from one or more sources without using citations is regarded as plagiarism. Sometimes students will copy and paste from an electronic source as a shortcut to doing the research and writing necessary to construct a good paper. This is the most egregious form of plagiarism and is easily recognized by instructors who often utilize electronic scanning programs that detect this type of cyber-plagiarism.

Copying means duplicating from a paper or electronic source by any means including, but not necessarily limited to mechanical means, electronic copying and pasting or entering data, or information from memory, without properly citing the source.

To avoid plagiarism, be sure to include a citation within the paper where the quote occurs (in-text or parenthetical citation), as well as a reference list at the end of the paper that contains information describing the sources used in the text (works cited list). Consult your course materials and instructor for instructions.

Instructors have the authority to deal with plagiarism in a paper according to their best judgement. Normally, copying one short quotation without properly citing it will result in deduction of points and instructions to rewrite the offending section. Larger infractions will usually result in a major loss of points and the requirement to rewrite the entire paper. Copying all or nearly all of a paper will usually result in an automatic loss of all points for the paper.

Multiple infractions of the academic honesty policy in a given course will result in a loss of points that could result in a failing grade in the course and removal from the program.

If students have questions about this policy, they should contact their instructor. Failure to understand this policy regarding violations of academic integrity when writing papers will not excuse any student from its consequences. In the enforcement of the policy, no notification is needed between occurrences. If three
occurrences are found in your course prior to your instructor grading your work, each occurrence will be treated as an individual case and the enforcement will apply as shown above.

Review the Student Handbook for more specifics. If you have any questions regarding the academic integrity policy, please consult your instructor prior to taking module exam one.

**Required Computer Accessories:** It is recommended that students use a desktop or laptop computer, PC or Mac, when taking the course. Some tablet computers are potentially compatible with the course, but not all features are available for all tablet computers. The latest full version of Google Chrome, Firefox, Edge, or Safari browser is required for the optimal operation of the Canvas Learning Management System. In addition, some courses will use the Respondus Lockdown Browser for exams. Instructions on downloading and installing this browser will be given at the start of the course. It is recommended to also have the latest version of Flash installed as a browser plugin as some sections of the course may require it. We highly recommend using a high-speed Internet connection to view the video lectures and labs. You may experience significant difficulties viewing the videos using a dial-up connection.

For more information on basic system and browser requirements, please reference the following:

**Module Topics**

**Module 1:** An introduction to the study of psychology. This module begins with a survey of the history of psychology as an academic discipline, with coverage of prominent theorists and theories. Some myths about the field are debunked, and students are introduced to the variety of subfields within psychology. Students are then introduced to basic research methods and statistics to help students become good consumers of psychological research and knowledge. Topics include the types of research studies utilized in psychology, ethics in psychological research, and measures of central tendency and variability.

**Module 2:** This module begins content on various subfields of psychology, starting with biological psychology. Content includes a brief section on genetics and more detailed information on the nervous system. The module will introduce students to neurons, neurotransmitters, key brain regions, and neuroimaging techniques.

**Module 3:** An overview of sensation and perception. Students will learn terminology and concepts in this area of inquiry. The module also covers specific sense organs, with particular emphasis on visual and auditory sensation and perception. Finally, the module covers key concepts in perception with specific focus on Gestalt theories.
Module 4: This module covers three types of learning: classical conditioning, operant conditioning, and social learning. Students are walked through the process of classical conditioning, using historical and modern examples. Students are then introduced to the terminology and concepts associated with operant conditioning, as well as schedules of reinforcement. Finally, content covers famous researchers and studies in the area of social learning.

Module 5: An overview of past and current theories and research in cognitive psychology. Students are introduced to information processing theory and terminology, intelligence theories and theoreticians, and memory tasks, stages, and terminology.

Module 6: This module covers motivation and emotion. The motivation section includes content on biological systems contributing to motivation, motivation terminology, and Maslow’s Hierarchy of Needs. The emotion section also covers biological contributions to emotions and emotion theories that explain the integration of physiological responses and the subjective feeling of an emotion.

Module 7: This module on developmental psychology begins with an overview of theoretical perspectives and research techniques in this subfield of psychology. The module then covers physical, cognitive, and social development. Specific topics include growth spurts, multidirectional development, Piaget’s stages of cognitive development, language development, Erikson’s stages of socioemotional development, Baumrind’s parenting styles, Kohlberg’s stages of moral development, and gender development.

Module 8: This module focuses on personality theories, beginning with psychodynamic theories and theorists. Freud and Jung are particularly emphasized. Content also covers key terminology and important personality theories and assessments such as the Big Five theory of personality, the MMPI, and NEO-PI. As in most modules, a critique of these theories is presented, in this case by Walter Mischel. Finally, this module covers states of mind, with topics such as stages of consciousness, circadian rhythm, the sleep cycle, sleep disorders, hypnosis, meditation, and psychoactive drugs.

Module 9: An overview of DSM-5. This module includes detailed coverage of the following areas from DSM-5: Depressive Disorders and Bipolar Disorders, Anxiety Disorders, Obsessive-Compulsive and Related Disorders, Trauma-and-Stressor-Related Disorders, Schizophrenia Spectrum Disorders, Personality Disorders, Neurodevelopmental Disorders, and Feeding and Eating Disorders. Finally, this module covers prominent psychotherapies and matches psychological disorders with therapies typically used to treat these disorders. Content on drug therapies is also included.
Module 10  This module introduces students to social psychology, including coverage of the following topics: social norms and scripts, conformity, Solomon Asch’s conformity/resistance to conformity studies, groupthink, obedience, Stanley Milgram’s studies on obedience, and bystander effect. Content also includes theory and terminology pertaining to interpersonal attraction, including Sternberg’s triangular theory of love and the matching hypothesis. Finally, students are introduced to important ideas such as cognitive dissonance, fundamental attribution error, and self-serving bias.

**Suggested Timed Course Schedule** (to complete the course within a typical college semester)

All Portage courses are offered asynchronously with no required schedule to better fit the normal routine of adult students, but the schedule below is suggested to allow a student to complete the course within a typical college semester. Despite this suggestion, the students may feel free to complete the course at their desired pace and on a schedule determined by them.

**Grading Rubric:**

Check for Understanding = 1 pt.
10 Module exams = 30 pts. each x 10 = 300 pts.
Paper 100 pts
Final exam = 60 pts. 60 pts.
Total 461 pts.

The current course grade and progress is continuously displayed on the student desktop.

**Grading Scale:**

89.5% - 100% (413 - 461 pts) = A
79.5% - 89.4% (367 - 412 pts) = B
69.5% - 79.4% (321 - 366 pts) = C
59.5% - 69.4% (275 - 320 pts) = D
<59.4% (<274 pts) = F
**Suggested External References:**
If the student desires to consult a reference for additional information, the following textbooks are recommended as providing complete treatment of the course subject matter.

**Learning Support Services:**
Each student should be sure to take advantage of and use the following learning support services provided to increase student academic performance:

- **Video lectures:** Supports diverse learning styles in conjunction with the text material of each module
- **Messaging system:** Provides individual instructor/student interaction
- **Tech support:** Available by submitting a help ticket through the student dashboard

**Accommodations for Students with Learning Disabilities:**
Students with documented learning disabilities may receive accommodations in the form of an extended time limit on exams, when applicable. To receive the accommodations, the student should furnish documentation of the learning disability at the time of registration, if possible. Scan and e-mail the documentation to studentservices@portagelearning.com. Upon receipt of the learning disability documentation, Portage staff will provide the student with instructions for a variation of the course containing exams with extended time limits. This accommodation does not alter the content of any assignments/exams, change what the exam is intended to measure or otherwise impact the outcomes of objectives of the course.

**One-on-one Instruction:**
Each student is assigned to his/her own instructor. Personalized questions are addressed via the student dashboard messaging system.

Online learning presents an opportunity for flexibility; however, a discipline to maintain connection to the course is required; therefore, communication is essential to successful learning. **Check your messages daily.** Instructors are checking messages daily Monday-Friday to be sure to answer any questions that may arise from you. It is important that you do the same, so you do not miss any pertinent information from us.

**Holidays:**
During the following holidays, all administrative and instructional functions are suspended, including the grading of exams and issuance of transcripts.

- New Year's Day
- Easter
- Memorial Day
- Independence Day
Labor Day  Thanksgiving weekend
Christmas Break

The schedule of holidays for the current calendar year may be found under the Student Services menu at www.portagelearning.com

**Code of Conduct:** Students are expected to conduct themselves in a way that supports learning and teaching and promotes an atmosphere of civility and respect in their interactions with others. Verbal and written aggression, abuse, or misconduct is prohibited and may be grounds for immediate dismissal from the program.

This is a classroom; therefore, instructors have the academic freedom to set forth policy for their respective class. Instructors send a welcome e-mail detailing the policy of their class, which students are required to read prior to beginning the course.

**Grievances:** If for any reason a student has a complaint about the course work or the instructor, the student is advised to first consult the instructor, who will be willing to listen and consider your concern. However, if you don't feel you have received a satisfactory reply, contact the Academic Review Committee of Portage Learning for further consideration. The formal grievances process must be initiated via written communication. If desired, please file a written grievance to academics@portagelearning.com to initiate the process.

**Remediation:** At Portage Learning we allow a "one-time" only opportunity to re-take an alternate version of one module exam on which a student has earned a grade lower than 70%. This option must be exercised before the final exam is started. If an exam is retaken, the original exam grade will be erased and the new exam grade will become a permanent part of the course grade. However, before scheduling and attempting this retest, the student must resolve the questions they have regarding the material by reviewing both the old exam and the lesson module material. Once ready to attempt the retest of the exam they must contact their instructor to request that the exam be reset for the retest. Remember, any module retest must be requested and completed before the final exam is opened.

**Note:** Exams on which a student has been penalized for a violation of the academic integrity policy may not be re-taken.

Students needing remediation for grammar, spelling, and/or reading comprehension may be referred to a verbal skills course offered by Portage. If students need remediation in addition to a review of verbal skills, they may withdraw from the course in a manner consistent with the published refund policy in order to complete the prerequisites for PSYC 101 prior to beginning the course.
